

From: Nurse  
Subject: Type 1 Diabetes DKA Awareness Campaign  
Date: When Campaign Starts  
To: Parents

Hello,

The nonprofit [Beyond Type 1](#) is working with [School/ School District] to raise awareness about the warning signs of Type 1 diabetes, an autoimmune condition that can occur at any age and for which there is no known cause or cure. Recognizing the [symptoms](#) can help avoid diabetic ketoacidosis (DKA), which is a life-threatening emergency. Symptoms are often overlooked and attributed to other illnesses, such as the flu, strep throat, urinary tract infection, or a growth spurt. In the coming days, informational posters will be placed around campus, and the [School/ School District] community is encouraged to become familiar with the warning signs of DKA. Questions? Contact [Nurse].
